Jyothi Nookula is a Senior Product Manager for AI Devices at Amazon Web Services.

What You Will Learn In This Lesson

In this lesson you'll get an introduction to Machine Learning. You will learn about Generative AI and AWS DeepComposer. You'll also learn how to build a custom Generative Adversarial Network.

Machine Learning on AWS

ML Techniques and Generative AI

Generative AI with AWS DeepComposer

Generative Adversarial Networks

Model Training

Building a GAN Model with Sagemaker

What You Will Learn

We hope this will be an interesting and exciting learning experience for you.

Let's get started!
